

UniformDesk

Supplier Admin User Manual — setup, team, schools, supply & co-issue

Simple step-by-step guide for the supplier super user

How to use this manual

Start with **The short path**, then **First-time setup**. Critical step: Delivery note → **Post to campus stock**. Orders and invoices are optional for admission day.

Contents

1. What UniformDesk is
2. Abbreviations and terms
3. The short path (use this)
4. Sign in and find your way around
5. First-time setup (do this once)

14. Reports
15. Activity, notifications, and search
16. Branding and look
17. Printing
18. Daily rhythm (recommended)
19. Common questions
20. Quick menu map

1. What UniformDesk is

UniformDesk is your **supplier operations portal** for school uniforms.

As **admin**, you:

- Own the schools linked to your organisation
- Set up products, school catalogues, and admission kits
- Create and manage your team (admins and staff)
- Decide which campuses each staff member can work on
- Create delivery notes and **post stock to campus**
- Co-issue uniforms on admission day
- Monitor stock and issued reports
- (When needed) run orders and invoices

Important Phase 1 rule: schools do **not** log in for day-to-day work. Your supplier team runs the desk. Schools are campuses in the data.

Role	What they can do
Admin (you)	Setup, team, stock posting, supply documents, monitor, issue
Staff	Issue, still owed, basic reports — only on campuses you assign

2. Abbreviations and terms

UniformDesk uses short labels on screens, search, and printouts. Meanings:

Abbreviation / term	Meaning
SKU	Stock Keeping Unit — the product code (e.g. BLZ-NVY). School catalogue SKUs should match supplier product SKUs.
DN	Delivery Note — the packing document. Numbers look like DN-2026-....
Post to campus stock	Admin action on a DN that posts lines to the school ledger so co-issue can draw stock. Required for issue. No school login needed.
PO	Purchase Order — optional planning document before a DN. Search may show PO-.... Menu: Orders .
INV	Invoice — optional bill for a delivery. Numbers look like INV-.... Not required for co-issue.
KES	Kenyan Shilling — currency for unit prices and invoice amounts.
M-Pesa	Mobile money. On issue you store method + reference; on invoices you can send an STK prompt.
STK	SIM Toolkit prompt — M-Pesa push to a phone (invoice collection).
Campus	A school linked to your organisation — where stock and co-issue happen.
Co-issue	Issuing the admission kit to a student at the campus.
Still owed	Students whose kit is not fully issued yet (incomplete).
Kit	A named admission set (e.g. Form 1 Girls) with default items and quantities.
Slip	The issue record / printout created when you co-issue a student.
Ref / reference	Receipt number, M-Pesa code, or bank reference stored with payment method (not an amount on issue).

School **codes** (e.g. GFS, NHS) are short IDs you choose — not fixed system abbreviations.

3. The short path (use this)

You do **not** need the full Orders → Deliveries → Invoices loop to run admission day.

Golden path for go-live

```text

Login → Create school → Products → Select products onto school + 1 kit

→ Delivery note → Post to campus stock

→ Team (if staff will issue) → Test Issue

```

Admission day

```text

Staff (or you): Issue → Student → Kit → Method/Ref → Confirm

→ Still owed only if short

```

Needed for issue day	Can wait
School + catalogue SKUs + kit	Branding polish
Products (matching SKUs)	Purchase orders (PO)
DN + Post to campus stock	Invoices / M-Pesa STK
Staff campus assignment (if not you issuing)	

Standards that stay: campus ledger, slip with issuer name, payment method at the desk, admin vs staff roles, campus access for staff.

4. Sign in and find your way around

Sign in

- 1 Open the app login page (for example `https://your-domain/login`)
- 2 Enter your **admin** email and password
- 3 You land on **Home** (/supplier) — the operations monitor

If login fails with a message about school desk being closed, you are using a school account. Use a supplier admin or staff account instead.

Main navigation (admin)

Top / primary links

Menu	Purpose
Home	Overview of schools, deliveries, invoices, team
Issue	Co-issue uniforms at a campus
Reports	Issued today and campus stock
Schools	Create/link schools, open catalogues

More menu (overflow)

Menu	Purpose
Still owed	Students with incomplete kits
Deliveries	Create DNs and post to campus stock
Orders	Optional purchase orders
Invoices	Optional billing and collection
Activity	Timeline of what happened
Notifications	Alerts (e.g. DNs waiting for stock post)
Search	Find schools, SKUs, orders, DNs, invoices
Products	Your master product list (SKUs and prices)
Team	Users, passwords, campus access
Branding	Logo mark, colours, support contacts

Theme

Use the **theme** control in the header to switch look (default is **National** — institutional green and gold). Personal display preference only.

Sign out

Open your account menu → **Sign out**.

5. First-time setup (do this once)

Follow this order the first time you go live. Skip steps you already finished. Branding and team can wait until after stock is posted if you will issue yourself.

Step A — Add a school

- 1 Open **Schools**
- 2 **Create a school** — name + short code (e.g. NHS) → auto-linked

or **Link an existing school** by code

- 1 Open that school's **Catalogue & kits** next

Step B — Add supplier products

- 1 Open **More** → **Products**
- 2 Add each **SKU** (stock keeping unit / product code):
 - SKU (must match school item SKU later)
 - Name, category, sizes, unit price (**KES**)
- 1 Click **Add product**

Step C — School catalogue and kits

- 1 **Schools** → school → **Catalogue & kits**
- 2 **Items** — tick products from your master list → **Add ... to school**

(SKU, name, and sizes copy automatically — no retyping)

- 1 **Kits** — create at least one admission kit; pick lines from those school items

Step D — Delivery note + post stock

- 1 **More** → **Deliveries** → create a DN for the school (lines = products, sizes, qty)
- 2 Open the DN → click **Post to campus stock**
- 3 Confirm **Reports** → **Stock on hand** shows the sizes

Optional: create an **Order** first, then “Create delivery from order”. Not required.

Step E — Team (if staff will issue)

- 1 **More** → **Team** → add staff with temporary password
- 2 Tick campuses → **Create user / Save campuses**
- 3 Share the password securely

Step F — Branding (optional)

More → **Branding** — brand name, mark, colour, support contacts → **Save branding**.

Step G — Smoke test

- 1 **Issue** → pick school → test student → kit → method/ref → confirm
- 2 Check **Reports** → **Issued today**
- 3 Check **Still owed** if you left a shortage

You are ready for live admission. Invoice when you are ready to bill — not before.

6. Team and campus access

Path: More → **Team**

Create a user

Field	Notes
Full name	Display name on slips/activity
Email	Login email (unique)
Role	Admin = full system · Staff = issue desk
Temporary password	At least 8 characters
Campus access (staff only)	Tick one or more linked schools

Staff **must** have at least one campus when you create them.

Assign or change campuses (staff)

On each staff card:

- 1 Tick / untick campuses under **Campus access**
- 2 Click **Save campuses**

Staff campuses	What they see on Issue / Still owed / Reports
One	That school only — no school picker
Several	Picker shows only their schools
None	Cannot issue until you assign campuses

Admins always see **all linked schools**. You do not assign campuses to admins.

Reset a password

On the person card → enter **New password** → **Reset**.

Activate / deactivate

Use **Deactivate** / **Activate** on the card.

You cannot deactivate yourself.

The system keeps at least **one active admin**.

7. Schools

Path: Schools

Create a school

- 1 Enter school name and code (2–12 letters/numbers, e.g. GFS)
- 2 Click **Create school**
- 3 Open **Catalogue & kits** next

Creating a school **auto-links** it to your organisation. No school login is created.

Link an existing school

- 1 Enter the school code
- 2 Click **Link school**

School cards

Each linked school shows open work plus shortcuts to catalogue, co-issue, and supply screens.

8. School catalogue and kits

Path: Schools → [school] → **Catalogue & kits**

Each school has its **own** items and kits.

Items

- 1 Open the **Items** tab
- 2 Under **Add from products**, tick the products this school uses
- 3 Click **Add ... to school** — SKU, name, and sizes copy from Products
- 4 Products already on the school are hidden from the list
- 5 To change an item later: open **Edit item** on the card → update SKU / name / category → **Save item**
- 6 Add extra sizes with **Add size**, or use **Add a custom item** only for a school-only SKU

Kits (admission sets)

- 1 Open the **Kits** tab
- 2 Name the kit (e.g. Form 1 Girls), set academic year
- 3 Add lines: **select** a school item (dropdown) + default quantity → save
- 4 To change a kit later: open **Edit kit** on the card → change name, year, or lines → **Save kit**
- 5 Use **Deactivate** if the kit should no longer appear on Issue

Kits are what the co-issue desk loads quickly for a new student.

9. Supplier products

Path: More → **Products**

Master price list for delivery notes (and for orders/invoices when you use them).

Add: SKU, name, category, sizes (comma-separated), unit price (KES).

Keep SKUs aligned with school catalogue items.

10. Deliveries and campus stock

Path: More → **Deliveries** (/supplier/deliveries)

This is the **critical supply step** for admission day.

Create a delivery note (DN)

- 1 Choose school (or create from an order if you used one)
- 2 Add product lines (size + qty)
- 3 Optionally tick **Mark as in transit**
- 4 **Create delivery**

Post to campus stock (required)

- 1 Open the DN
- 2 Check catalogue match (every line needs a matching school **SKU**)
- 3 Optional note → click **Post to campus stock**

What happens:

- An inbound receipt is created (your name as poster)
- Campus stock balances increase
- DN status becomes **delivered**
- Co-issue can draw those sizes

You do **not** need a school login. Staff cannot post stock — only admin.

If posting fails with a SKU error, add the matching item under **Catalogue & kits**, then try again.

Other DN actions

Action	When
Mark in transit	Optional tracking while still packed
Print DN	Paper pack / proof
Create invoice	When you are ready to bill (not required for issue)

Notifications may show **Post stock DN-...** for DNs that are not yet posted.

11. Orders and invoices (optional)

These support planning and billing. They are **not** required before co-issue.

Orders (/supplier/orders) — purchase orders (PO)

- 1 Choose school → add lines → **Create order**
- 2 Later: open order → create a delivery from it, or cancel

Skip Orders if you prefer to create a DN directly.

Invoices (/supplier/invoices) — bills (INV)

- 1 From a DN → **Create invoice**, or open Invoices
- 2 Print if needed
- 3 Collect: **Record payment** (cash / bank / other + reference) or **M-Pesa STK** (sandbox/test)

Desk payment on **Issue** (method + reference) is separate from invoice collection.

12. Co-issue on admission day

Path: Issue

Before you start

- School linked; catalogue + kit exist
- DN posted to campus stock for the sizes you will issue
- Staff (if not you) assigned to that campus

Issue steps

- 1 Open **Issue**
- 2 Pick campus if you manage several schools
- 3 Find or enter the student (optional parent name / phone)
- 4 Load a kit or adjust lines
- 5 Tick **Issue now** or untick to **Hold** per line
- 6 Enter **payment method**, **reference**, optional **KES amount**
- 7 Confirm

What happens: slip with your name as issuer; issued lines reduce stock; held/short lines open **Still owed** with reason. Slip shows a **parent receipt summary** (received vs pending).

Reports for fulfilment

- **Paid not collected** — paid/deposit lines still owed (aging)
- **Cash-up** — today's desk payments by method / amount

13. Still owed

Path: More → **Still owed** (or from Reports)

- 1 Select school if needed
- 2 Review the queue
- 3 **Issue what's left** to return to the issue desk
- 4 **Print list** for a paper follow-up

14. Reports

Path: Reports

View	What you see
Issued today	Who received what, payment method/ref, issuer
Stock on hand	Campus balances (view-only)

Use **Print report** for clean A4 (nav hidden).

15. Activity, notifications, and search

Activity

More → **Activity** — timeline of supply and co-issue events.

Notifications

More → **Notifications** — open work such as DN's waiting for **Post stock**, unpaid invoices, open orders.

Search

More → **Search** — type at least 2 characters for schools, products by **SKU**, or **PO-...** / **DN-...** / **INV-...** numbers.

16. Branding and look

Path: More → **Branding**

Setting	Effect
Brand name	Portal display name
Mark	Short letters in nav / documents
Primary colour	Accent colour
Support email / phone	Shown on slips/documents when set

Theme (National / Fluent / etc.) is separate — header theme menu.

17. Printing

Use the on-page **Print** button (hides menus). Prefer **A4 portrait**.

Document	Where
Issue slip	Slip detail
Still owed list	Still owed
Issued / stock report	Reports
Delivery note (DN)	Delivery detail
Invoice (INV)	Invoice detail

18. Daily rhythm (recommended)

Morning / prep

- 1 Notifications — post any DNs still waiting for stock
- 2 Reports → Stock — note tight sizes
- 3 Confirm staff campus assignments

During admission

- 1 Staff (or you) on **Issue**
- 2 Watch **Still owed**
- 3 Admin monitors Home / Activity

End of day

- 1 Reports → **Issued today** → print if required
- 2 Still owed → print follow-up list
- 3 Plan next DN + **Post to campus stock** for shortages
- 4 Invoices — only if you are collecting B2B payments today

19. Common questions

What is the minimum to issue on a campus?

School + matching catalogue SKUs + kit + DN with **Post to campus stock**.

Do I need an order before a delivery?

No. Orders are optional.

Do I need an invoice before admission?

No. Invoice when you bill. Stock posting is what unlocks issue.

Who posts stock — school or supplier?

You (supplier admin) on the DN. School login is closed in Phase 1.

Can staff post stock?

No. Ask an admin to open the DN and **Post to campus stock**.

Why did post stock fail?

Usually a missing school catalogue item for that **SKU**. Add it under Catalogue & kits, then retry.

Can more than one staff issue at the same school?

Yes. Assign them all to that campus. Prefer separate queues.

Why can't my staff see a school?

Not assigned. **Team** → save campuses.

Do SKUs have to match?

Yes for stock post. School item SKU = supplier product SKU.

Where do school logins go?

Closed in Phase 1. Your team operates the desk.

Can I delete the last admin?

No.

I forgot a password

Another admin resets it on **Team**.

Is stock shared across schools?

No. Each school has its own campus stock and catalogue.

20. Quick menu map

Menu	Admin	Typical job
Home	Yes	Monitor
Issue	Yes	Co-issue
Reports	Yes	Issued + stock
Schools	Yes	Create/link + catalogue
Still owed	Yes	Incomplete kits
Deliveries	Yes	DN + post campus stock
Orders	Yes	Optional POs
Invoices	Yes	Optional bill / collect
Products	Yes	Master SKUs

Menu	Admin	Typical job
Team	Yes	Users + campus access
Branding	Yes	White-label
Activity	Yes	Timeline
Notifications	Yes	Alerts (incl. post stock)
Search	Yes	Find records

Setup checklist (print this)

- ☐ School created or linked
- ☐ Supplier products added
- ☐ School items (matching SKUs) + at least one kit
- ☐ First DN created
- ☐ **Post to campus stock** done — stock visible on Reports
- ☐ Staff created + campuses assigned (if not issuing alone)
- ☐ Branding saved (optional)
- ☐ Test co-issue completed
- ☐ Print test on the admission printer
- ☐ Invoice later (when billing)
